

## Portfolio Progress Report

Phoenix Core Conservative

March 2024

"The return of your portfolio is important, but so is the risk taken to get there. Never underestimate risk."

## M RNINGSTAR Wealth

### **Confidential Report**

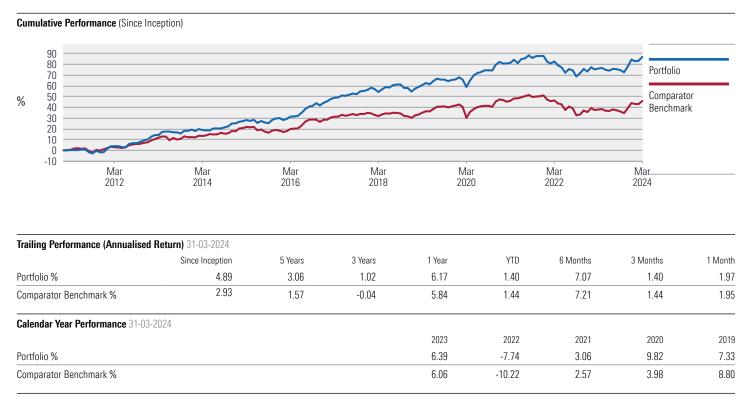

For professional advisers and their clients using the Phoenix Core Portfolios. O2024 Smart Investment Management Ltd.

### Performance

Inception / Launch Date	Last Rebalance Date	Time Horizon	Annual Management Charge	Underlying Funds Cost	Comparator Benchmark
17th February 2011	22nd February 2024	5+ Years	0.20%	0.36%	IA Mixed Investment 0-35%
					Shares

### **How Has The Portfolio Performed?**

The portfolio generated a return of 6.17% over the past twelve months. Since inception we have delivered 4.89% annualised performance along with the careful management of risk.

Comparator Benchmark: IA Mixed Investment 0-35% Shares

The returns shown may not be the same as the returns of an investor's actual account and this due to various factors including the investment date by the investor and differences across platforms. The returns are calculated through Morningstar Direct, are provided for illustrative purposes only and should not be viewed as the performance of an actual account. The trailing returns shown are cumulative and year-on-year returns show complete 12-month periods. All performance is shown net of the holdings' management fees and expenses based on the cheapest share class available; however does not include the 0.20% per annum charged by Smart Investment Management Ltd, the advisor fees or the Platform fees, therefore the actual performance experienced will be lower once these charges have been taken into account. You should be aware that the share class used to compile the above performance may not be available via all platforms. Past performance is not a guide to future returns.

## Portfolio Positioning

Inception / Launch Date	Last Rebalance Date	Time Horizon	Annual Management Charge	Underlying Funds Cost	Currency
17th February 2011	22nd February 2024	5+ Years	0.20%	0.36%	GBP

### **Overview And Key Thoughts**

Equity markets overall posted strong returns over the quarter, helped by continued economic resilience. Economic activity remained solid, as did employment rates, and inflation continued to move lower. Strong company earnings helped equity markets, especially for AI- (artificial intelligent) related companies.

Equity returns were far from uniform across countries. Japanese stocks rose strongly, while U.K. equities nudged out a small gain despite a recession announcement, which occurred in the second half of last year. Performance was similarly divergent across emerging markets; Chinese and Brazilian stocks experienced losses, while India gained. For China, losses occurred in January, whereas February and March saw most of these losses recovered.

From a sector perspective, technology and communication-services outperformed, while consumer discretionary stocks lagged due in large part to weakness in the automobile industry. Smaller companies also struggled versus their larger counterparts, although still delivered positive outcomes for investors.

The market's appetite for mega-cap stocks continued, with the "Magnificent Seven" dominating performance, although this was heavily swayed by Nvidia, which rose more than 80% in the first quarter. Outside of Nvidia, Tesla was down -27% in the quarter—the worst stock in entire S&P 500. Apple was also down 11%, while Google was up 8% but trailed the broad market.

Turning to bonds, improving news on the global economy caused yields to inch higher (prices fall), providing a headwind for fixed income asset classes, as the more positive outlook pushed out expected interest rate cuts. Longer-dated bonds underperformed their short-dated counterparts (longer-dated bonds are more impacted the expected change of interest rates). High-yield bonds were a standout winner among fixed income.

Looking ahead, market participants are trying to reconcile a few key developments. On one hand, the market backdrop appears favourable, with sentiment improving and company earnings rising. On the other hand, central banks may not pursue rate cuts at the speed many hoped, with valuations edging on expensive across many measures. Taken together, we believe a cautionary optimistic stance is warranted, balancing risk and return drivers while selectively identifying pockets of opportunity.

### **Current Positioning**

Given the market environment, it is imperative that we seek assets that can provide protection in the event of adverse conditions, whilst also identifying assets that will drive performance over the longer term. The latter is based on understanding the underlying fundamentals, including cash flows, whilst taking advantage of price movements, aiming to improve risk-adjusted returns.

In order to manage risk and sustainably grow wealth, we hold 25.91% in equities, with 67.50% in fixed income and 6.59% in cash/money markets.

The portfolio continues to be biased to those opportunities that rank highly and diversifiers that are driven by different factors. Fixed Income exposure is accessed across the government and corporate space in different regions, including specific exposure to the UK and US, as well as Emerging Market debt and inflation-linked bonds. These assets provide defensive and opportunistic properties, whilst delivering an attractive yield. Further defensive positioning is gained through exposure to high-quality companies, as well as specific exposure to Healthcare, Infrastructure and Consumer Staples, which can help protect in the event of a market downturn. Our key growth opportunities include Emerging Markets equity, including specific exposure to China equity, Japanese equity and UK equity.

Asset Allocation 31-(	03-2024

## Recent Portfolio Changes

Inception / Launch Date	Last Rebalance Date	Time Horizon	Annual Management Charge	Underlying Funds Cost	Currency
17th February 2011	22nd February 2024	5+ Years	0.20%	0.36%	GBP

Risk levels change over time, so it is important we acknowledge such shifts and gain exposure to assets that offer the best reward for risk over time. As we do this, we are always seeking to maintain the correct risk exposure and minimise costs (both in fees and turnover).

## Our Convictions

		The	following information is provided to give context to the current portfolio positioning
Broad Asset Class	Sub Asset Class	Our Conviction	Key Long-term Drivers
Equities	United States		While some broadening has occurred of late, performance has been dominated by mega-ca growers. We're finding more value outside these companies.
	Europe ex-U.K.		Sticky inflation is now moderating in Europe, which has led to market optimism. Parts o Europe remain attractive on a country and sector basis.
	U.K.		The U.K. is operating on a different trajectory to peers, although inflation is now easing Sector exposure plays an important role, including high offshore earnings.
	Japan		Japan's ongoing structural reform has sparked a huge rally in stocks. The relative appeal is now muted, with currency returns forming the bulk of expected returns.
	Emerging Markets		The emerging-markets complex is seeing significant dispersion, with China, India, and Brazi all at different points. A stronger U.S. dollar hurts, and risks must be managed.
	Germany		German stocks are well poised, offering solid balance sheets and further upside to earnings although our view has moderated.
	Global Energy		Following a weak 2023, the relative appeal has since stabilised, although it does not stand out. European energy is our preference.
	U.S. Banks		The banking industry remains fundamentally healthy, with headline risks abating. Long-term profitability appears durable, although valuations are starting to move toward fair.
Fixed Income	Government Bonds: U.S. & U.K.		We've seen significant moves across the yield curve in recent times. Treasuries remain attractive to us, and the defensive attributes are appealing.
	Government Bonds: Europe		European Treasuries have seen yields stabilise, although remain below many peers. The appeal is moderate at best.
	Inflation-Linked Bonds		Inflation-protected securities continue to warrant some attention as they have repriced more attractively due to inflation expectations falling.
	Investment-Grade Corporate Bonds		Yields are still healthy, although the credit spread to government bonds is only fair. Credit quality is worth watching, but low default rates persist.
	High-Yield Credit		The extra yield to cover default risk has fallen. Care must be taken as the rate-hiking cycle could affect creditworthiness.
	Emerging-Markets Debt (Local)		Emerging-markets debt issued in local currency still offers attractive yields and prospective currency returns.

Overall conviction is a long-term judgement built on a five-point scale from "Low" to "High". Typically judged on a 10-year horizon, a "Low" means that reward-for-risk is likely to be subdued, whereas a "High" means reward-for-risk is appealing. This incorporates our four pillars of conviction including: 1) absolute valuations, 2) relative valuations, 3) fundamental risk and 4) a contrarian scorecard. Convictions are as at 31/03/2024 and are subject to change at any time without notice. References to convictions and specific asset classes do not constitute a recommendation to buy or sell securities.

### **Phoenix Wealth Management Limited**

The Phoenix Wealth Management Portfolios are exclusive to Phoenix Wealth Management Limited and managed by Smart Investment Management Ltd on a discretionary basis. Phoenix Wealth Management Limited is authorised and regulated by the Financial Conduct Authority, reference number 190353. Registered address Dunraven House, Meadow Court, 41-43 High St, Witney, Oxfordshire, OX28 6ER. Registered in England, Company No. 03605826.

Phoenix Wealth Management Portfolios are intended for citizens or legal residents of the United Kingdom. These portfolios can only be made available using investment advisers appropriately authorised and regulated by the Financial Conduct Authority. The materials pertaining to the Phoenix Core Portfolios are prepared by Smart Investment Management Ltd, and Phoenix Wealth Management Limited are the issuing entity.

#### Important information

The information, data, and analyses presented herein do not constitute investment advice, are provided as of the date written and are not warranted to be correct, complete or accurate. The statistics noted are derived from the holdings and statistics of the funds underlying this Phoenix Core Portfolio. The data used to formulate the portfolio statistics is from information contained in Morningstar Inc's database on the underlying funds as of the month end date listed, therefore, the information may not be reflective of the portfolio's current holdings and/or statistics.

The allocations shown within this report are subject to change without notice. A Portfolio Rationale document will be issued to the adviser in any instance where a change has been made to the portfolio.

#### Smart Investment Management Limited

The Phoenix Core Portfolios are offered by Smart Investment Management Ltd which is the entity providing the discretionary management services. Smart Investment Management Ltd is authorised and regulated by the UK Financial Conduct Authority to provide services to Professional clients. Phoenix Core Portfolios are intended for citizens or legal residents of the United Kingdom. These portfolios can only be made available through the use of an Investment Adviser appropriately authorised and regulated by the Financial Conduct Authority. Registered Office: 1 Oliver's Yard, 55-71 City Road, London, EC1Y 1HQ.

#### **Risk Warning**

Unless stated otherwise, all data and information is presented at 31/03/2024. It is important to note that investments in securities involve risk and will not always be profitable. Smart Investment Management Ltd does not guarantee that the results of its investment decisions or the objectives of the portfolio will be achieved.

Smart Investment Management Ltd does not guarantee that negative returns can or will be avoided in any of its portfolios. An investment made in a security may differ substantially from its historical performance and as a result, portfolios may incur a loss. Past performance is no guarantee of future results. The value of investments may go down as well as up and investors may not get back the amount invested.

Specific securities mentioned should not be viewed as a recommendation to buy or sell such securities. There is no guarantee that a diversified portfolio will enhance overall returns or will outperform a non-diversified portfolio. Neither diversification nor asset allocation ensure a profit or guarantee against loss. It is important to note that investments in mutual funds involve risk, including as a result of market and general economic conditions, and will not always be profitable.
