

Phoenix Gaia Andante

July 2026 quarterly factsheet

Objective, Strategy and Suitability

Objective

The portfolio aims to achieve consistent risk-adjusted returns over the longer term (minimum five years) by investing in assets that have a strong alignment to the UN Sustainable Development Goals, with a focus on total return, whilst limiting risk to a level suitable for a Conservative investor.

Strategy

The portfolio uses a multi-asset, globally diversified approach, primarily investing in investment funds, to provide exposure to a wide range of asset classes, which can include equities, fixed interest, property, commodities, alternatives, and cash. It is run with a focus on downside protection, knowing that retail clients consider reduced short-term losses a positive outcome, and that limiting such drawdowns aids long-term performance.

Suitability

The portfolio is suitable for clients with an investment horizon of at least five years, want a portfolio run at a Conservative risk level, and who are happy to accept capital fluctuations in the shorter-term to achieve a higher rate of return over the longer-term.
